## NEC 2024 Speaker Bio

Vince Corbisiero, Sales Director AeroBOSS Solutions, Indra Air Traffic, Inc

Vince started his career in the U.S. Air Force in Aircraft Maintenance on the AC130 Spectre Gunship (1<sup>st</sup> Special Operations Wing). He transitioned to Flight Crew and Served as Illuminator Operator (IO) on both the AC130H and AC130A (Reserves) for six (6) years.

Vince says he loves being in the “fumes,” and most of his career has been on-airport. He served in numerous roles including Station Agent, Lead Agent, Supervisor and finally, Ramp Manager for American Airlines from 1986 until 1998. After that he joined the Greater Orlando Aviation Authority (GOAA) where he served in various roles including oversight of Orlando International’s Common-use facilities, including ticket counters, baggage handling systems and Federal Inspection Stations. He transitioned to Aviation Technical Services Manager where he was responsible for Noise Abatement, Emergency Operations, management of the Lightning Detection System and “other duties as assigned!”

He left GOAA in 1998 to pursue business development roles at Exelis and INFORM and now Indra Air Traffic Inc.

Vince says he loves being in the airport operations environment most, given the fast-paced environment and critical function of the airfield. “Who doesn’t love to watch a crosswind landing?”

- Since he has experience in Part 139 operations, his focus is on safety and efficiency above all.

Vince is a graduate of Embry-Riddle Aeronautical University (B.S. Professional Aeronautics) and is currently pursuing a Master’s Degree in Aeronautics at Liberty University (completion in 2025). His goal is preparing future aviation professionals with a “real-world” educational experience.

Vince is the father of two (2) daughters and three (3) dogs, including a Sheepadoodle and two (2) Bichons.

He lives with his wife Angela in the Blue Ridge Mountains of southwest Virginia (not far from Roanoke).
