

Bio of Kevin A. Gurchak

Kevin is the Environment Contract Manager at Inland Technologies International Limited where he is responsible for managing existing contracts and developing new working relationships with airports, airlines, consultants and contractors.

He has nearly 30 years of aviation experience and has for airline (USAirways) and an airport (PIT) where he managed environmental, health & safety, sustainability, and wildlife hazard management activities. As a service provider he clearly understands the complexities associated with aviation-related work.

Kevin has significant experience in the aircraft and airfield deicing/anti-icing arena, including water quality management and spent aircraft deicing fluid (SADF) management.

Kevin is actively involved in Great Lakes Chapter and the North East Chapter of AAAE. Previously he served on the ACI-NA Environmental Affairs Committee (serving as Chair and various other positions including the Airport Industry Recovery Advisory Panel and the PFAS Experts Group), AAAE Environmental Services Committee, the SAE G-12 Committee, participated in numerous Airport Cooperative Research Program (ACRP) panels, and was actively involved in the development of the Airport Deicing Effluent Limitation Guideline.
