

Glenn Ponas is the Executive Director of Aerium, a Pennsylvania-based nonprofit advancing aviation innovation and workforce development. With over three decades in education and technology leadership, Glenn has championed initiatives that connect classrooms to careers in aviation and aerospace. Since joining Aerium in 2024, he has accelerated statewide efforts to create aviation career pathways, securing new CIP codes, expanding drone and maintenance programs, and forging partnerships with industry leaders like Boeing and Lockheed Martin. Under his leadership, Aerium launched groundbreaking projects such as Drone814—the nation’s first BVLOS medical drone delivery network—and established Aerium West to expand access for underserved communities. Previously, Glenn served as Director of High School Outreach for AOPA, growing its Aviation STEM Curriculum from 160 to over 1,400 schools nationwide. A certified private and remote pilot, Glenn is a recognized voice in aviation education and workforce development across national forums.
