

2025 Hershey Aviation Conference Bio Submission

Title:

Development of a U.S. Hydrogen Economy Centered on Aviation Infrastructure and New Energy Transition Clusters

Bio:

Jason Smeak is AECOM's Global Transportation ESG Leader, Americas Hydrogen Transportation Market Leader. He also serves as the Global Supply Chain and Logistics Advisory Leader, as part of AECOM Transportation's Global Goods Movement team. He brings an experience set covering the Plan, Source, Make, Deliver, Return and Enable processes of supply chain management. Jason is a systems-thinker who understands global supply chains from a business and operational standpoint. He has worked within the transportation sector for over 20 years, aiding public and private entities with supply chain strategy, planning, infrastructure and operations improvements, ESG and decarbonization strategy, resiliency, and new technology and energy transformation implementations. His experience and advisory capability is multi-modal in nature— covering aviation and advanced air mobility, freight rail, ports and marine, medium and heavy-duty commercial trucking, and off-highway equipment. Jason often works at the intersection of freight and passenger transportation, driving transportation sustainability and resiliency efforts, both internally and externally.
