

*Michael Eberle*

As a Technical Director and Subject Matter Expert at TRC, Michael is recognized as a leading authority on per- and polyfluoroalkyl substances (PFAS) and emerging contaminants. Mr. Eberle's expertise includes forensic chemistry, remedial design, and system operation, with a focus on developing cost-effective strategies for site closure. He has delivered numerous presentations and training seminars on PFAS to regulatory agencies, including the NYS Department of Environmental Conservation, and has contributed to groundbreaking research on PFAS fate, transport, and remediation. His published works and technical leadership have advanced industry understanding of PFAS soil adsorption, transformation, and water treatment optimization.
