

Michael La Fazia, PE, serves Engineering Program Manager for Design and Planning Programs in the Port Authority of New York and New Jersey's Traffic Engineering group. He previously served as the lead agency traffic engineer for LaGuardia Airport's Redevelopment and as managing principal of Traffic Engineering's Traffic Management Group. In his current role, he acts as "Traffic Czar" for JFK Airport's Redevelopment Program, ensuring traffic flow is maintained despite aggressive construction throughout the facility. He also oversees the majority of Traffic Planning and Design work for the Authority, including work on the Midtown Bus Terminal Replacement.
